IVSTech provides a broad range of products that combine unsurpassed health plan knowledge with proprietary Product Consulting, Resource Development, Configuration Automation and Staffing solutions.

We are committed to supporting Health Plans to increase automation, respond to change and better serve their customers through the effective use of technology and people. This commitment and our proven record of delivery to our customers since 2005, makes **IVSTech** the obvious choice as your support partner.

IVSTech's lead consulting team has over 45 years of experience in health plan operations and providing Health Management Information System (HMIS) products and services. In addition to our experience, services, professional network and in-depth knowledge, **IVSTech** offers one of a kind flexible tools, solutions and proven processes that provide the added value you expect from a product-oriented support partner.

Exciting new product offerings:

Health Plan System Maintenance (HPSM) solution. This web-based product provides Facets customers with the ability to apply common configuration updates and changes through a rules-based standardized platform. By simplifying the approach to mass updates to the Facets system, this wizard driven solution saves time, improves quality and provides the speed to market necessary for the health plan to be competitive in the marketplace.

Talent Management Resource Assessment (TMRA) solution: This self-service web-based product provides the ability to evaluate a candidates competency within predefined knowledge areas/ system modules, and to help identify aptitude to assist in cultivating existing BSA's to better support your business.

Resource Development Program (RDP): This program uses a systems approach to identify aptitude and cultivate resources with the skills needed to support health plans. The model is designed to identify, evaluate, quantify, develop, and retain skilled resources. The program leverages the proprietary TMRA solution, complete with supplied Facets assessment content.
